# ULTRACOLD JET T33

## TREATMENT MENU - example

### **The T33 Luxe Rejuvenation Treatment: Face & Neck**

**Advanced one off treatment for radiant skin.**

**Includes:**

- A comprehensive consultation
- Clinical before & after photos
- Complimentary follow up & review session 4 weeks later

**From AU\$350 – \$450 per session**

### **T33 Elevation Series – 3 Treatment Series: Face & Neck**

**A targeted corrective series designed to visibly tighten, brighten & restore the skin's structural dermal matrix, refine skin texture and enhance radiance.**

**Includes:**

- A comprehensive consultation
- Clinical before & after photos
- Complimentary follow up & review session 4 weeks later

**From AU\$1020 – \$1320 for 3 sessions**

### **T33 Total Dermal Remodelling – 6 Treatment Series: Face & Neck**

**Our signature transformation program for full dermal collagen remodelling, skin tightening & long term dermal rejuvenation.**

**Includes:**

- A comprehensive consultation
- Clinical before & after photos
- Complimentary follow up & review session 4 weeks later

**From AU\$1980 – \$2580 for 6 sessions**

### **IMPORTANT**

Providers assess each client & recommend the appropriate treatment areas & series of treatments for each individual. One single treatment serves as an advanced one off facial & will not achieve full potential maximum benefit.

A series of 3 – 6 treatments are recommended for longer term benefits.

This is a beauty treatment — no medical claims are made, and no specific outcomes are promised.

Results may vary from person to person depending on genetics, health & lifestyle factors.

# WHAT IS PROFOSMA ULTRACOLD T33 JET PLASMA

The Ultra Cold Jet T33 represents the next evolution in professional cold plasma technology, engineered to deliver exceptional performance, precision, and regenerative treatment capability for the modern aesthetics industry.

Developed through advanced international collaboration, the T33 combines precision-engineered German core modules with next-generation system architecture designed for elite aesthetic professionals.

Operating at up to 19.8kV, the device supports advanced collagen stimulation, skin rejuvenation, scalp treatments, and regenerative plasma protocols with exceptional versatility. Built for professional clinical environments, the T33 features an advanced thermal management system that maintains operational stability during high-voltage treatments. Unlike conventional portable systems, it operates via direct mains power to maximise plasma efficiency while reducing internal heat generation. From skin revitalisation and anti-aging treatments to acne, scalp, and regenerative applications, the T33 delivers a powerful next level experience.

Treatments only take 3 - 20 minutes.

# ADVANCED TIP TECHNOLOGY

The Ultra Cold Jet T33 features precision engineered roller-style consumable tips designed for consistent plasma delivery, smooth treatment application, and professional hygiene standards.

Each tip provides approximately 100–120 minutes of usage depending on treatment protocols and maintenance.

- Dedicated T33 Consumable Tip System
- Precision Plasma Energy Delivery
- Advanced Roller-Style Tip Technology
- Approx. 100–120 Minutes Usage Per Tip
- Designed For Professional Clinical Use
- Supports Consistent Treatment Performance

**MINIMAL TO NO PAIN OR DOWNTIME**

**NO NEEDLES & NO DOTS**

**The treatment is suitable for**

**All Skin Types, All Skin Conditions & All Fitzpatricks**

The standard treatment protocol consists of a cleanse, application of Jet Plasma, Serum, Moisturiser & SPF. There are plenty of treatment upgrade possibilities to incorporate in to a true multi modality skin journey.

## WHY CHOOSE JET PLASMA

Jet Plasma technology has become an increasingly valuable addition to modern aesthetic clinics looking to expand their treatment capabilities with advanced non-invasive solutions.

As client demand continues to grow for treatments that support skin rejuvenation with minimal downtime, clinics are seeking technologies that combine versatility, treatment flexibility, and strong client appeal within a competitive aesthetics market.

JET PLASMA  
*Australia & New Zealand*

# WHY CHOOSE JET PLASMA

It's adaptable treatment applications allow clinics to integrate Jet Plasma across multiple service categories, supporting both standalone procedures and combination-based treatment plans.

This flexibility helps clinics diversify their offerings while providing solutions suitable for a broad range of client concerns and treatment goals. In addition to treatment versatility, Jet Plasma supports clinics through modern technology positioning, helping practices offer innovative aesthetic solutions aligned with current industry trends and growing consumer interest in advanced skin-focused treatments.

- Expands clinic treatment offerings
- Supports non-invasive aesthetic protocols
- Minimal downtime for clients
- Versatile treatment applications
- Suitable for multiple treatment goals
- Enhances service diversification Aligns with modern aesthetic trends
- Designed for professional clinic environments
